

Pragmatic Digital Musicology

Tim Crawford, David Lewis
{ t.crawford | d.lewis } @gold.ac.uk

Utopian digital musicology

“by the year 2000 [...], we should be able to transcribe, publish, analyze, and interpret the whole surviving corpus of historical music. That would leave room for only two kinds of musicologists: one group to predict what's the composers will do next, the other group [...] to check up on the accuracy of the predictions.

The rest of us could retire to Tahiti.”

Jan LaRue, 'New directions for style analysis', *Musicology and the Computer 1966-2000* (New York, 1970)

Pragmatic Digital Musicology

- Humanities data is messy and complicated
- Corpus building is **never** complete
- User needs, computable algorithms and music theory seldom align

- Embrace (but evaluate) imperfection
- Adopt iterative strategies robust to changing data and systems

I. Corpus building

The Electronic Corpus of Lute Music (ECOLM)

Phase I

Manual data entry (c. 250 pieces)

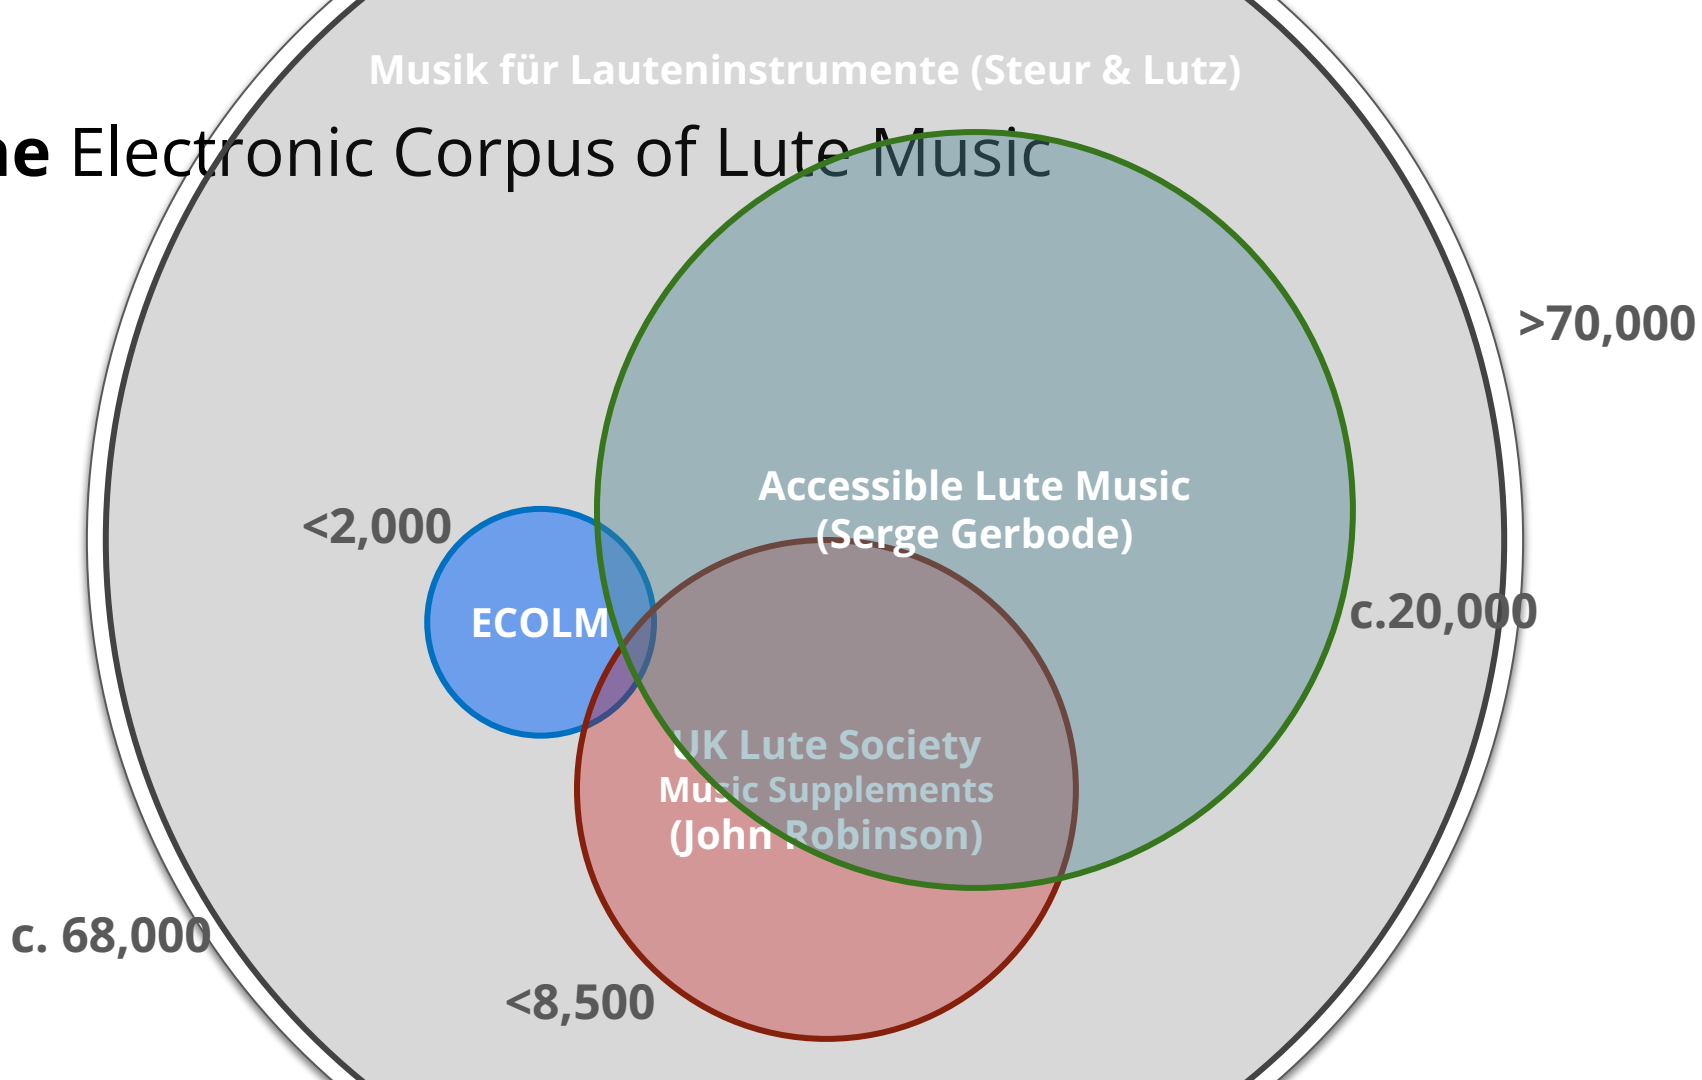

Phase II

Manual and corrected OMR (c. 850 pieces)

Phase III

Crowdsources corrected OMR (c. 1600 pieces)

The Electronic Corpus of Lute Music

Pragmatic corpus building

What sustainable steps can we take to make these useful to digital musicology?

How do we do this sustainably with the resource creators?

What happens when the resource creator stops?

II. Search

Exploring renaissance music at scale with F-Tempo

Working with Golnaz Badkobeh and Alastair Porter

Full-text searching of musical scores

There is a shortage of large collections of machine-readable music notation...
... but there is an increasing amount of digital images of music notation

Just as Google Books uses Optical Character Recognition (OCR),
... we can use Optical Music Recognition (OMR)

Note-names:

F A A G F G A B

Rest

Clef

Optical Music Recognition (OMR)

There are two types of errors that have a lasting effect:

1. Rhythmic errors (everything afterwards is offset in time)
2. Clef errors (everything afterwards is offset in pitch)

Workarounds:

1. Ignore rhythm
2. Use relative pitch (intervals) – and ignore accidentals ('diatonic pitch')

Cipriano de Rore (1515-65), 5-voice madrigal, 'Cantiamo lieti', *Canto* part-book (Venice, 1563)

Cipriano de Rore. I CANTO

Antiamo lie ti Cantiamo lie ti il fortunato giorno che stringe
s' un nodo sacro amo e tenace coppia si de gna e con ardente face il fe dia
uino' amor leggiadro adorno e con ardente face il fe diuino' amor leggiadro adorno cantia mo
lieti che gia d'ogn' intorno s'allegri il cielo l'aria el uento tace e' l' bel seren' appare e' gia si
sface a tutti gli animanti un bel soggiorno e' gia si sface a tutti gli animanti un bel soggiorno no e'
gia si sface a tutti gli animanti un bel soggiorno.

Note-names:

F A A G F G A B

Intervals:

2 0 -1 -1 1 1 1

Encoding:

B - a a A A A

Searching Music and Music Information Retrieval (MIR)

Searching music is complicated because music is a complex phenomenon

Music happens in our heads

What is music similarity? No-one agrees!

No surprise - there are probably as many kinds of musical similarity as people

Passage-Level Retrieval for Music

Given a large collection of images, from music libraries around the world, we want to be able to do two main things:

1. Find pages of music similar to a query page (***document-level*** retrieval)
2. Find occurrences of a musical pattern in the collection (***passage-level*** retrieval)

Each page has ~100 notes

We have 557k page images with 58 million notes

This demands ***indexing*** because of scale. Close analogy with Google Books, but indexing ***musical*** content, not text

Cantiamo lieti il fortunato giorno

Prima parte

Anonymous sonnet

Cipriano de Rore (c.1515-1565)

Il secondo libro di madrigali à 5 voci (Gardano press, Venice, 1544)

Cantiamo lieti il fortunato giorno
Che strins'a un nodo sacr'almo e tenace
Coppia si degna e con ardente face
Il fe divino amor leggiadro adorno.
Cantiamo lieti, che già d'ogn'intorno
S'allegr'il cielo, l'aria e 'l vento tace,
E 'l bel sereno appare, e già si sface
A tutti gli animanti un bel soggiorno.

Cipriano de Rore (1515-65), 5-voice madrigal, 'Cantiamo lieti', Canto part-book (Venice, 1563)

Cipriano de Rore. I CANTO

Extending this

- Index whole library collections directly through IIF
- Index digital scores (such as CPDL)
- Index polyphonic and embellished sources (tablatures) - currently hard

III. Musicological close readings

Working with many people (Kevin Page, David Weigl, Johannes Kepper, Mark Saccamano, ...)

Utopian approaches?

Musicological research...

- ...may start with no clearly-defined corpus
- ...may build up incrementally
- ...may work with an expanding, changing corpus
- ...may work with evolving methodologies

Incremental approaches to tooling...

- Support tool chaining via data standards
- Design data assembly into the research process
- Accept mixed, imperfect, changing data

Musicological research...

- ...may start with no clearly-defined corpus
- ...may build up incrementally
- ...may work with an expanding, changing corpus
- ...may work with evolving methodologies

Pragmatic Digital Musicology
